Re: Ltr. No. T41-027, Soil Sampling and PCB Analysis - Site 13 at
the former NCBC Davisville, Rhode Island, Dated 3 April 1996

Dear Mr. Otis:

The Environmental Protection Agency (EPA) has reviewed the above
referenced technical memorandum and has the following comments:

1. delineation of the contaminated area should be continued
until two (2) consecutive lateral samples are under the
cleanup criteria. Therefore, an additional sample should be
located west of the one proposed west of #36. Depending on
the results of the proposed sampling, additional sampling
may need to be conducted to provide the appropriate level of
comfort with the delineation of the contaminated area.
2. Please provide EPA with a 1 week advance notice prior to
field mobilization for this additional sampling effort.

If you have any questions with regard to this letter, please
contact me at (617) 573-5736.

Sincerely,

Christine A.P. Williams
Remedial Project Manager
Federal Facilities Superfund Section
